Autism diagnosis in adults. It is quite common for people to go through life without a diagnosis. For some people getting a diagnosis may help them to understand difficulties they have as well as help them to get reasonable adjustments at work or university. The first step to getting a diagnosis is to arrange an appointment with your GP.

UpToDate

Autism prevalence in California, based on persons eligible for state-funded services, rose throughout the 1990s. The extent to which this trend is explained by changes in age at diagnosis or inclusion of milder cases has not been previously evaluated.Autism ...
