English-Chinese  
bilingual children with  
ASD and monolingual  
children with ASD were  
compared in a study  
[5]. The authors  
concluded that  
bilingualism did not  
have a negative effect  
on the children's  
language development,  
as both groups had  
similar vocabulary  
scores.

## **DEVELOPMENT AND DISORDERS IN KOREAN ...**

Abstract. The impact of bilingual exposure on language learning has not been systematically studied in children with Autism Spectrum Disorders.

This study compared the social abilities and language levels of children (mean age = 56 months) with ASDs from bilingual (n = 45) and monolingual (n =

Bilingualism in  
Speakers' Second  
Language

Development. There is  
a lot of research out  
there about

bilingualism in  
language development

AND research  
concludes.....that

learning more than one  
language is  
FANTASTIC. However,

File Type PDF

Bilingual

Language

there can be a lot of confusion out there, even between professionals, about how bilingualism affects language development.

**Bilingualism in  
Language  
Development In  
Children**

Learning another language will not cause or worsen speech or language problems.

Bilingual children

Bilingual

Language

Just like some monolingual children have a language delay or disorder, a similar proportion of bilinguals will have a language delay or disorder.

Evidence that one bilingual child has a language difficulty, however, is not evidence that bilingualism leads to language difficulties in general.
