China's Geography: Globalization and the Dynamics of ...

China has great physical diversity. The eastern plains and southern coasts of the country consist of fertile lowlands and foothills. They are the location of most of China's agricultural output and human population. The southern areas of the country (South of the Yangtze River) consist of hilly and mountainous terrain. The west and north of the country are dominated by sunken basins (such as the ...

China's Geography: Globalization and the Dynamics of ...

Despite China's obvious and growing importance on the world stage, it remains often and easily misunderstood. Perhaps this is due in part to the pace of the nation's remarkable rise and the many economic, political, and environmental problems that have accompanied its growth. Indeed, there are many Chinas, as this comprehensive survey of contemporary China vividly illustrates.

China's Geography: Globalization and the Dynamics of ...

The first historical instance of China engaging in internationalism was during the Han Dynasty. At the start of the Han Dynasty, the Huns in the north were attacking the frontiers of Han and trying to obtain riches. Emperor Wu of Han wanted to gain an alliance with a country called Dayuezhi so the two countries could join together and fight against the Huns.

Geography for Kids: China

The discipline of Geography has looked at the effects of Globalization not only on economic systems but also on societies and cultures. While in the 1990s and early 2000s, many works began to look at Globalizations' impact on trade and policy, later works increasingly focused on major changes to education, healthcare, family structures, and other aspects of human society and culture affected ...
