The Hesston 1150 is a 12 ft pull-type, 540 rpm, power take-off driven mower conditioner. The rigid cutting platform uses a conventional reciprocating knife, a cam action reel and dual feed augers. Two intermeshing rollers crimp the crop. Rear shields form a windrow. The mower conditioner is driven mechanically by a power take-off shaft.

Hesston has been known as the hay and forage innovator since 1955, when the company developed the first commercially available self-propelled windrower. Other industry firsts have included the first hydrostatic windrower, the first center-pivot mower-conditioner and the first big square baler—which had nearly 50 individual patents of its own.
