in the ovary. We will base our time line on a 28-day cycle, but the cycle is highly variable and in some women it is not a consistent length from one month to another. Since it is a cycle, we can begin with any phase. However, it is customary to call the first day of menstruation Day 1 of the menstrual cycle, because menstruation is visible and easy to document.

Menstrual Cycle Quiz | Geeky Medics

Estrogen is the primary sex hormone in women and it functions during the reproductive menstrual cycle. Women have three major types of estrogen: estrone, estradiol, and estriol, which bind to and activate receptors within the body. Researchers discovered the three types of estrogen over a period of seven years, contributing to more detailed descriptions of the menstrual cycle.
