Lectures on scientific computing with Python. A set of lectures on scientific computing with Python, using IPython notebooks. To open these notebooks in IPython, download the files to a directory on your computer and from that directory run: \$ ipython notebook This will open a new page in your browser with a list of the available notebooks.

Athena Scientific - Special Discount

It is a gentle approach to programming for students who intend to make a career in some other field. Contrary to the author's claim on the cover, it is NOT an introduction to the field of Computer Science. There is much, much more to the science of computing than simply learning a programming language.

Introduction to Python - MicroObservatory

NumPy is not another programming language but a Python extension module. It provides fast and efficient operations on arrays of homogeneous data. NumPy extends python into a high-level language for manipulating numerical data, similar to MATLAB. Advantages of NumPy It's free, i.e. it doesn't cost anything and it's open source.
