Fingerprints 15. committed to memory. For the binary system these reduce to 1 + 1 = 10 and 1 × 1 = 1; whereas for the decimal, each table has 100 entries. Yet this advantage is more than offset by lack of compactness: thus the decimal number 4096 = 212 would be expressed in the binary system by 1,000,000,000,000.
