Stratified Morse Theory. Abstract. Suppose that X is a topological space, f is a real valued function on X , and c is a real number. Then we will denote by $X \leq c$ the subspace of points x in X such that $f(x) \leq c$. The fundamental problem of Morse theory is to study the topological changes in the space $X \leq c$ as the number c varies.

Stratified Morse theory (Book, 1988) [WorldCat.org]

Stratified Morse Theory by Robert MacPherson, Mark Goresky. Due to the lack of proper bibliographical sources stratification theory seems to be a "mysterious" subject in contemporary mathematics. This book contains a complete and elementary survey - including an extended bibliography - on stratification theory, including its historical development.
