I have a Zetron Model 5 that's been working fine. I went in to the programming to change some things and saved it. Now it has four dashes on the screen and won't do anything. Keypad presses don't do anything and the \* + 3 to get into programming mode doesn't work either. Any thoughts on getting this baby working again? It's a great backup unit tied to a radio and is stupid proof for people.
